

Eurotherm®

Eycon10 & 20 Visual Supervisor

More than a display... creative visualization solutions that put you in control

Eycon10 and Eycon20 visual supervisors are local control panels that offer colour TFT LCD touchscreen displays and are capable of continuous, sequential, and logic control. Eycon combines multi-function control, recording, and visualization in a single process management unit. The open network architecture allows connection to the process interface i.e. T2750 PAC, PLCs and other 3rd Party devices. Separating the processing and operator interface from the I/O, the control modules, and the phases allows for physical distribution of the modules, which results in reduced wiring costs.

Multi-setpoint programmer

Many applications need to vary the process value over time. Temperature control is one such application in which it is very common to 'ramp' the process value from one level to another over a specified time period using a setpoint program.

The Eycon provides support for multiple setpoint programs that can be run simultaneously. Each program is capable of profiling up to eight channels, with as many as 32 segments per profiled channel. In addition to controlling the setpoint during each segment of the profile, the controllers can also be used to activate up to 128 digital events during each segment.

The setpoint program feature enables an operator to select and run a preconfigured setpoint program. A preview facility allows the selected program to be viewed before running. Once the program is running, the setpoint preplot and the historically achieved process values are both plotted on the trend screen.

Batch control

Batch Manager provides comprehensive batch control; allowing an operator with suitable access permissions to load, start, hold, restart, or abort a batch. The batch status can also be monitored from standard displays. Each batch can be identified by a batch ID entered by the operator, or by a unique automatically generated batch number. The six customisable operator entry fields can also be used to further identify batch data. Batch phases are supported and phases which the batch went through are used to further analyse the batch data.

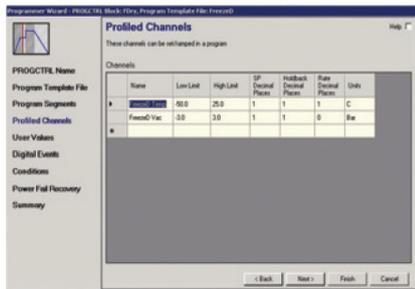

- Colour touchscreen display
- Peer to peer communications
- Modbus master/slave
- Profibus master
- 10/100Mbps Ethernet
- Continuous and sequential control
- Multi-setpoint programmer
- Batch control
- Recipes
- USB support
- 21 CFR Part 11 auditor
- Data logging
- Open communications
- Alarm management
- Multi-language support
- Heat treatment application editor

Auditor

The Auditor option for the visual supervisors is designed specifically to aid compliance with FDA regulation 21 CFR part 11 for ERES (Electronic Records and Electronic Signatures). Tamper resistant electronic data, including time stamped Audit Trails can be viewed, analysed, and printed using the Eurotherm™ Review software package. Reports can also be generated directly and printed via the USB port to a suitable printer.

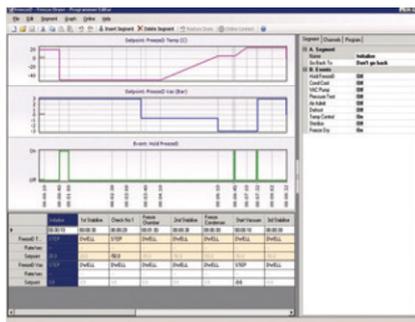

Setpoint program Wizard

For ease of use, LINtools incorporates a Wizard for creating setpoint programs. By following the on screen prompts and editing the parameters as required, a setpoint program can be simply and quickly created with all required blocks automatically added to the database.

Setpoint program editor

In addition to the Setpoint Program Wizard, programs can also be created or edited off-line using the Setpoint Program Editor supplied with LINtools. As an ActiveX, this tool can be inserted in any of your visualization packages.

Specification

Environmental performance

Temperature limits	Operation: 0 to +50°C Storage: -20 to +60°C
Humidity limits	Operation: 5% to 85% RH (non condensing) Storage: 5% to 95% RH (non condensing)
Protection	Bezel and display: IP66 Sleeve (rear of panel): IP20
Shock:	BS EN61010
Vibration (10 to 150Hz):	BS EN60873, Section 9,18
Altitude:	<2000 metres

Approvals

Electromagnetic compatibility CE, (EMC)	
Emissions and immunity:	BS EN61326-1:2006
Electrical safety (BS EN61010-1:2001):	Installation cat. II; pollution degree 2

INSTALLATION CATEGORY II
The rated impulse voltage for equipment on nominal 230V mains is 2500V.

POLLUTION DEGREE 2
Normally, only non-conductive pollution occurs. Occasionally, however, a temporary conductivity caused by condensation shall be expected.

Physical

Panel mounting:	DIN43700
Panel mounting angle:	Vertical
Eycon10	Bezel size: 144 x 144mm
	Panel cutout dimensions: 138 x 138mm (both -0/+1mm)
	Depth behind panel: 86.8mm (106.8mm with Profibus option)
	Weight: 1.5kg (1.7kg with Profibus option)
Eycon20	Bezel size: 288 x 288mm
	Panel cutout dimensions: 282 x 282mm (both -0/+1.3mm)
	Depth behind panel: 70mm (90mm with Profibus option)
	Weight: 3.7kg (3.9kg with Profibus option)

Operator interface

Type:	Colour TFT LCD, with cold cathode backlight, fitted with resistive, analogue, touch panel
Size and resolution	Eycon10: 1/4VGA (320 x 240 pixels) 5.5" Eycon20: XGA (1024 x 768 pixels) 12.1"

Language support

English, French, German, Spanish, Dutch, Italian, Portuguese and other*

Power requirements

Supply voltage:	19.2 to 28.8V dc (24V dc nominal)
Power consumed	Eycon10: 20W Eycon20: 24W
Operating current:	1A max.
Inrush current:	10A max.
Fuse:	No user replaceable fuses

Battery backup

Type:	Poly-carbonmonofluoride/lithium (BR2330)
Support time (RTC):	1 year min. with unit unpowered
Replacement period:	3 years
Stored data:	Hot start parameters

Data logging storage

Internal archive:	45Mb flash memory
Data format:	ASCII (.asc) or compressed data (UHH)
Data compression:	Proprietary
Log frequency	1Hz max.

Ethernet communications

Ethernet port:	10/100Mbps auto sensing
Protocols:	TCP/IP, FTP, DHCP, BOOTP, Modbus, Telnet
Cable	Type: CAT5
	Maximum length: 100 metres
	Terminator: RJ45

Serial communications

Ports:	2
Protocol:	Modbus RTU, master and slave
Transmission standard:	EIA422 or EIA485

Profibus master

Termination:	9 way D-type
Protocol:	Profibus DPv1
Nodes supported:	124
Data rate:	Selectable between 9600 and 12M Baud
Isolation:	Functional

Open communications

Protocol:	Device driven
Data rate:	Selectable 1200 – 38.4k bits/sec; none/even/odd parity; 1 or 2 stop bits

Master I/O comms

Modbus TCP slave:	Used to talk through only
Modbus TCP master:	Slave connections 20 max

Modbus/Jbus (EIA422/485) Slave

Connectors:	Shielded RJ45 connector
Protocol:	Modbus/JBUS RTU slave
Data rate:	Selectable from 1200 to 38,400 baud
Data format:	8-bits, 1 or 2 stop bits, selectable parity
Modbus:	Data tables 64, configurable as registers or bits
Table length (max.):	200 registers or 999 bits
Memory allocated to tables:	20480 bytes
Isolation:	Functional

Modbus TalkThru

TalkThru is provided on the Eycon Series in order to enable use of Eurotherm iTools package to configure Modbus slave devices without having to disconnect them from the Eycon.

Universal Serial Bus (USB)

Version:	1.1 (2.0 devices are compatible)
USB ports:	1 or 3
Devices supported:	USB bulk storage devices ('Memory stick'), USB mouse, bar code reader, printers
Isolation:	No signal isolation

	Database	SFC
Legacy (for V2.1 or lower using the existing SPP)	145Kb	112Kb (Program Data resources), 73Kb (SFC resources)
Default (for V3.0 or higher using the new SPP)	255Kb	56Kb (Program Data resources), 38Kb (SFC resources)
Large SFC/Small Database	181Kb	112Kb (Program Data resources), 73Kb (SFC resources)
Large Database/Small SFC	319Kb	28Kb (Program Data resources), 19Kb (SFC resources)

Table 1

Setpoint program editor resources

Programs:	Max. no. limited by available database memory
Profiled Channels:	8 max. per program
Digital Events:	128 max. per program
User Values:	32 max. per program
Segments per Program:	32 max. per program

A maximum of 8 programs can run concurrently.

Continuous database resources

Maximum Database size:	See Table 1
------------------------	-------------

Database resources (for default option)

Database blocks:	512 max.
Database Templates:	100 max.
Template Libraries:	50 max.
External Databases:	32 max.
TEATTS:	512 max.
FEATTS:	128
Servers:	8
Connections:	1024

Sequence control resources

Sequence Memory:	Program data and SFC resources See Table 1
Simultaneously active independent sequence tasks:	10
SFC actions (incl. root SFC's):	50
Steps:	160
Action associations:	600
Actions:	300
Transitions:	255

Recipes

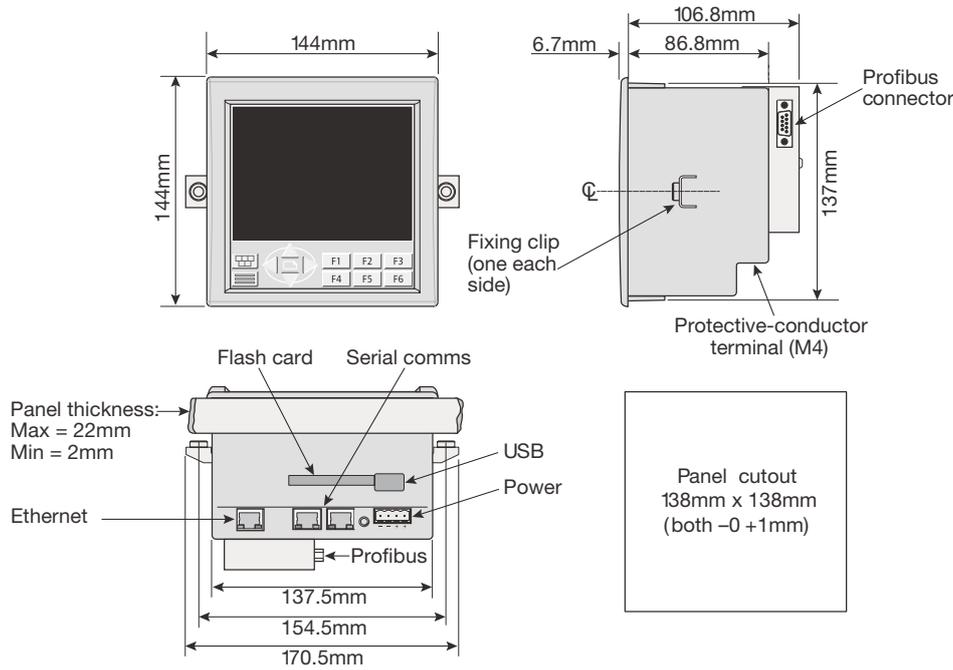

Recipe sets (files):	8 concurrent
Production lines:	8 max. per set
Recipes:	16 max. per set
Variables:	1000 max. per set

Batch

Batches (files):	8 concurrent
Max. no. of phases per batch:	40

Eycon10 Visual Supervisor Dimensional Details

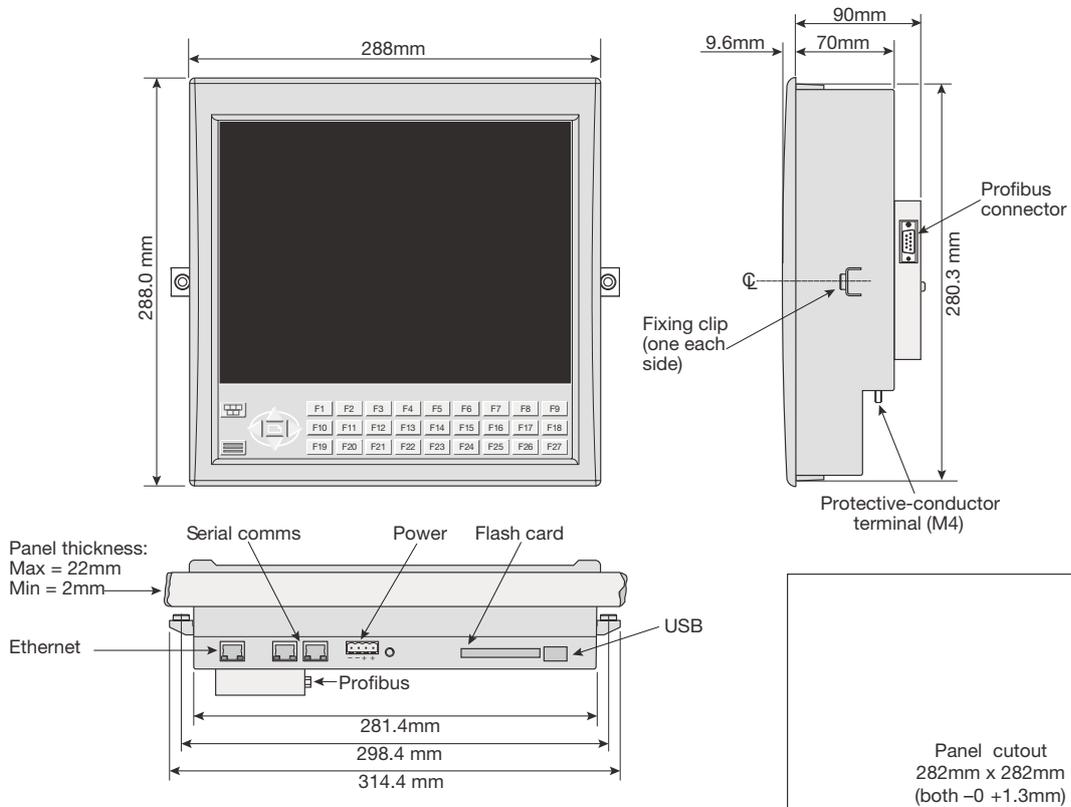

Panel Mounting Details

Installed panel angle:
Vertical panels only.

Minimum inter-unit spacing:
50mm, vertical or horizontal.

Note: Where multiple units are mounted in close proximity with one another, steps must be taken to ensure that the resulting ambient temperature does not exceed the specified maximum operating temperature of 50° Celsius.

Eycon20 Visual Supervisor Dimensional Details
