Accelerate Your Project Delivery

Industrial Control Panel Featuring EPC3004 Programmable Controller

Designed to provide a complete control solution and delivered from stock to help meet short lead times, this industrial panel with Eurotherm EPC3004 controller is ideal for projects where a custom control panel has not been budgeted for and fast delivery is needed. Its standardized UL508A approved design satisfies a variety of machine control applications.

Benefits

- Industry-leading Eurotherm single loop precision PID control with input measurement accuracy of 0.1% of reading at 50ms sample rate
- All I/O points are wired to an easily accessible industrial terminal strip
- Compact UL508A/cUL508A approved polycarbonate control panel, available in stainless steel upon request
- NEMA 4X enclosure, sealed for use in harsh environments and washdown applications
- Seamless building automation integration with native BACnet IP communication

Key Features

- Two universal analog inputs for temperature, pressure, flow, calculated values, etc.
- Two 4-20mA outputs, two relay outputs, one digital input
- Modbus RTU, Modbus TCP IP and BACnet IP Ethernet communications
- Ability to control two valve positioners in 1/3 : 2/3 mode
- High visibility customizable three-color controller display with scrolling text message display and dedicated beacons for easy visualization of alarm status
- Front panel on/off power switch and two red alarm lights
- Pre-configured with a basic heating application using iTools configuration software. Simply enter setpoints and run the auto-tune function
