How Does EcoStruxure Manufacturing Compliance Advisor Work?

The EcoStruxure platform is the digital backbone connecting best-in-class operational technology (OT) solutions with the latest in information technology (IT) to unlock trapped value in your operations and leverage the true potential of the Internet of Things.

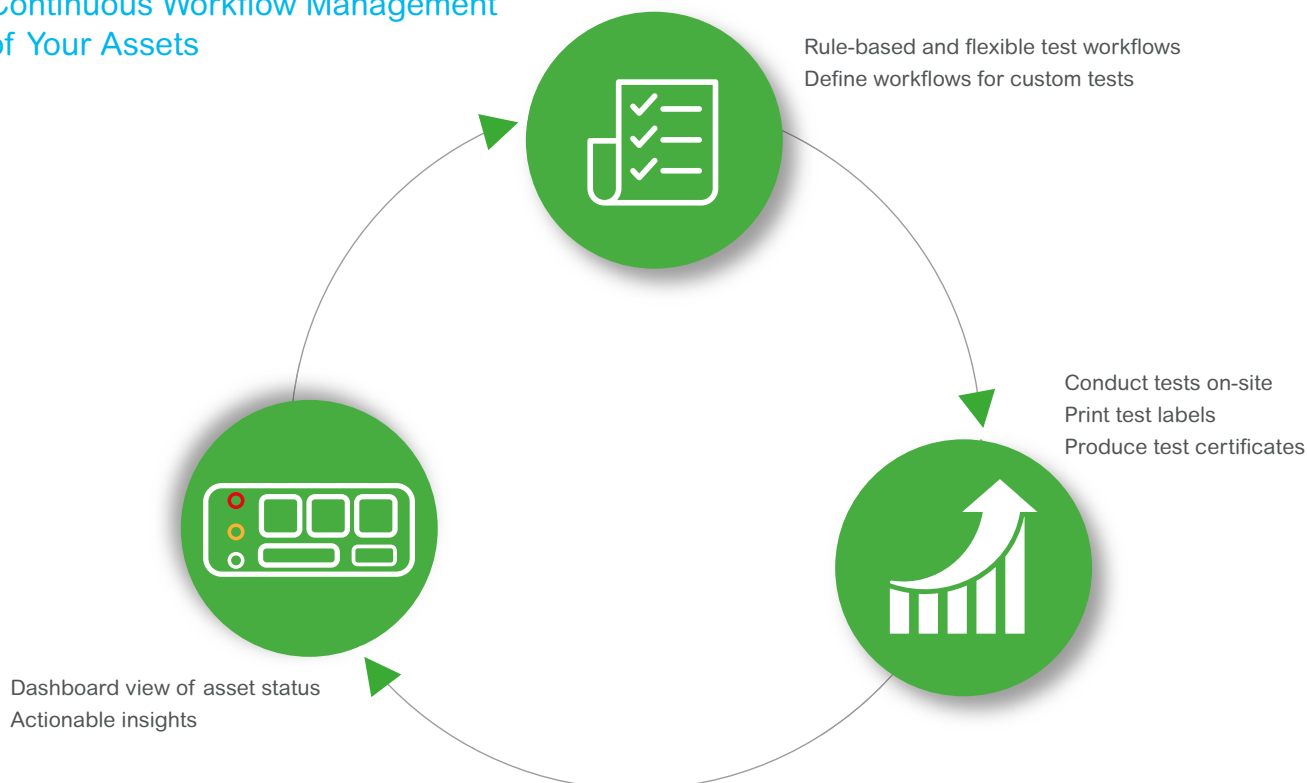

EcoStruxure Manufacturing Compliance Advisor enables end-users and their service supply chain to manage asset testing & calibration activity. This allows them to:

- Optimize manufacturing process equipment and surrounding plant facility
- Always be prepared for an audit, with instant access to test documentation via a QR code

Compliance Dashboard

Continuous Workflow Management of Your Assets

How Does a Digital Services Platform Improve the Operational Efficiency of a Production Environment?

Improve Energy Efficiency

Poorly calibrated instruments may lead to increased energy requirements, as the process may require additional energy to achieve setpoint or result in poor quality finished products.

Minimize Testing Costs

Reduce testing costs. Simplify the data collection, approval and distribution workflow. Centralize test and compliance management, planning & performing tests of any type. A flexible and collaborative, role-based service delivery.

Increase Test Productivity

Reduce test errors and re-testing with dedicated workflows and prescribed work instructions. Avoid production disruptions and downtime by

efficiently managing complex test schedules. Integrate with existing systems and workflows with optional API integration.

Aid Regulatory Compliance Process

Be prepared for an audit and reduce your pre-work time. Manage asset compliance with real-time inventory status, visible across the organization. Streamline audits with on-site calibration certificate retrieval via QR code.

Reduce Operational Costs

- Pay-as-you-go with a subscription that grows with your business needs
- Minimize ongoing maintenance costs – no hardware or software installation means no updates or patches to worry about

Efficiently manage compliance requirements and enjoy instant online access to your data* – affordably and reliably. Anywhere, anytime.
