

EOS Advisor

Manage Compliance and Calibration Requirements More Efficiently

Product at a glance

Improve conformance testing to regulatory standards with a hosted, mobile-first tool. Reduce testing costs, increase productivity and be prepared for an audit with a robust testing and approval process.

Reduce Testing Costs

- Simplify the data collection, approval and distribution workflow
- Centralize test and compliance management, planning and performing tests of any type
- A flexible and collaborative, role-based service delivery model

Increase Test Productivity

- Reduce test errors and re-testing with dedicated workflows and prescribed work instructions
- Avoid production disruptions and downtime by efficiently managing complex test schedules
- Integrate EOS Advisor with existing systems and workflows with optional API integration

Be Prepared For An Audit

- Verify asset compliance with real-time inventory status, visible across the organization*
- Streamline audits with on-site calibration certificate retrieval via QR code

Manage Compliance and Calibration Requirements More Efficiently

Efficient Test Management

Plan, perform, approve and centrally manage compliance tests performed by Technicians. Increase test efficiency whilst minimizing costs.

Plan

Set up, schedule and assign tests of any type.

- Set rule-based workflows for Calibrations
- Define flexible workflows for Custom tests

Perform

Improve the data collection process.

- Conduct tests on-site
- Print calibration labels
- Produce test certificates

Approve

Utilize a robust, digital workflow.

- Secondary or peer approval
- Extend approval to customers

Manage

Centrally-manage testing of assets.

- Dashboard view of asset status
- Show compliance via QR code labels

API Integration

Integrate EOS Advisor with existing systems and maintain preferred workflows via the EOS Advisor API (Application Programming Interface).

Specifications

Platform Requirements:

	O/S:	Windows 7+ or OSX 10.8+
	RAM:	4GB
	CPU:	1.33GHz
	Screen Resolution:	1280 x 800

	O/S:	Android 6.0+ or Windows 10+
	RAM:	4GB
	CPU:	1.6GHz
	Screen Resolution:	1920 x 1200

Supported Printers:

	Zebra P4T
	Zebra QLN320
